  [WAEC]

TECHNICAL SKILLS

- **Frontend Development:** React.js, HTML, CSS, JavaScript, Tailwind CSS

- **Backend Development:** Basics of Node.js

- **Database:** Firebase

- **Tools & Platforms:** Git, GitHub, VS Code

VOLUNTEER EXPERIENCE

Computer-Based-Test (CBT) Web Application Developer

Fellowship of Christian Biological Science Students (FCBSS) Association, [April, 2023] – Present

- Developed a fully functional web quiz application from scratch using React.js and Firebase.
- Implemented dynamic question fetching, enhancing the flexibility and scalability of the application & mastering the methods of data fetching backend databases from my experience with working with firebase
- Integrated a Speech synthesis read-out feature using Window speech-synthesis API built into JavaScript, improving accessibility for users.
- Built an in-app calculator for quick computations during the quiz.
- Designed a timer with a danger zone notice to alert users as they approach the time limit ensuring that a seamless user-experience is guaranteed.
- Ensured a responsive and user-friendly interface using Tailwind CSS across mobile several devices and screen width.
